

SANDBLASTING CABINET

Type ECO 420

The Canablast ECO 420 sandblast cabinet features dual side doors and a large front door for easy loading and unloading. The lower hopper stores the abrasive material for reuse or easy removal.

The Canablast ECO 420 uses a powerful vacuum system to keep the work area free of "floating" dust and used abrasives shells. After the abrasives contacts the surface to be cleaned, a portion of the abrasives is "destroyed" becomes almost weightless. The vacuum system removes the "floating" dust particles and the "used up" abrasives. Those abrasives that still retain a cutting surface (and weigh more) then fall to the bottom of the cabinet where they pass through a straining screen and into the collection bin and are reused.

The Canablast ECO 420 has a foot pedal that controls the flow of abrasives from the air gun. The foot pedal allows the operator to concentrate on the work to be done inside the cabinet rather than hold the trigger of a gun.

Features

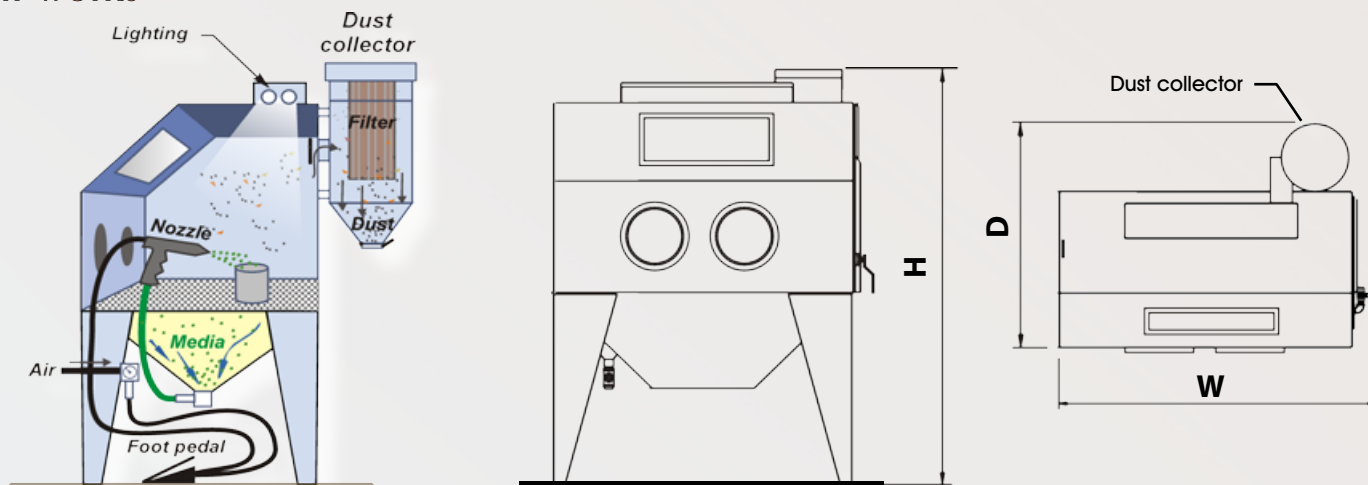

- Foot operated control valve
- Side and top load doors
- Self-contained dust collection system with cartridge filter and convenient bottom gate clean-out
- Heavy-duty blasting gun
- Tear away window shields

Markets

- General manufacturing
- Aerospace and aviation
- Marine
- Automotive
- Petroleum
- Power & energy
- Pharmaceutical
- Powder coat paint
- 4 ceramic nozzles
- Air pressure regulator
- Air pressure gauge

The Canblast ECO 420 is always ready when you are. The cabinet can be constantly connected to your air supply and is ready for immediate use when you step on the pedal. Use your new sandblast cabinet to remove scale or heavy rust from automotive parts, clean up rusty tools, etch glass, or any other special application.
