

DUST COLLECTORS MODELS DC100 to 330

The models DC100 to 330 dust collectors are designed for heavy-duty use and are the most efficient for preventing dust from escaping into the work environment and contaminated machines and work surfaces.

It is ideal for those who are on a middle budget and cannot afford the more efficient and much more convenient higher end models of shaker dust collector with head motor like DCM serie.

The DC100 to 330 are the appropriate solution for dust filtration of various applications without the use of any available compressed air. It is an pneumatic system shaker, dust collector requiring minimal supervision and maintenance.

Markets

- General manufacturing
- Aerospace and aviation
- Marine
- Automotive
- Petroleum
- Power & energy
- Pharmaceutical

Features

- Dust collector features an energy-saving air-filtration system captures 99% of all particles five (5) microns or larger.
- Bags-type dust collectors standard, offering improved efficiency and durability (available in 600, 900 and 1200 CFM models).
- No anti-deflagration devices required
- Good cost
- Barrel dust outlet with trap door
- Ease of access to the filter bags
- Replacement bags readily available
- Can be operated with either pressure or suction sandblasting cabinets.
- CSA approved and made in Canada.

No other dust collector on the market today offers the many practical benefits included on a ISTblast dust collector as standard equipment. Just look at the features. The standard components in a ISTblast system have been carefully designed for safety, ease of operation, reduced maintenance and increased productivity.
